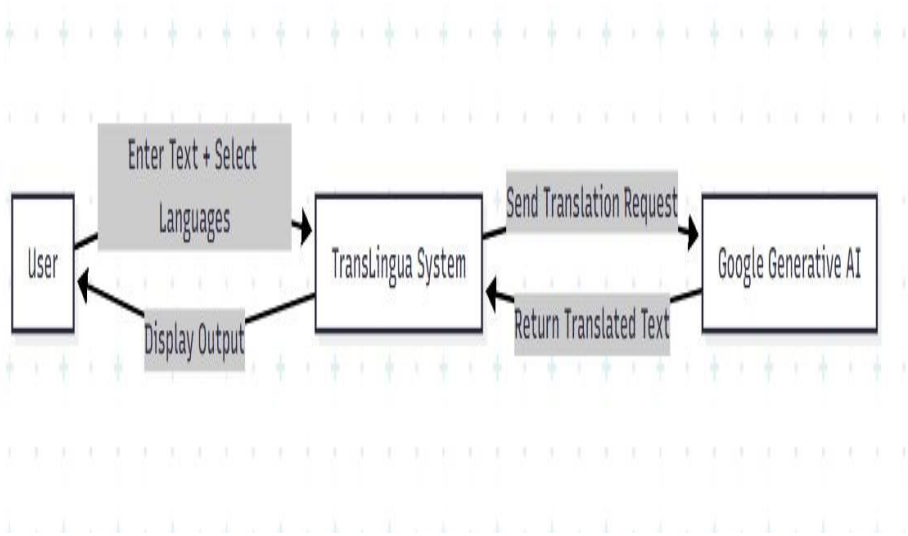
Project Design Phase-II
Data Flow Diagram & User Stories

Date	02 February 2026
Team ID	LTVIP2026TMIDS34601
Project Name	TransLingua
Maximum Marks	4 Marks

Data Flow Diagrams:

A Data Flow Diagram (DFD) is a traditional visual representation of the information flows within a system. A neat and clear DFD can depict the right amount of the system requirement graphically. It shows how data enters and leaves the system, what changes the information, and where data is stored.

Example: (Simplified)



User Stories

User Type	Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance criteria	Priority	Release
End User (Web)	Text Translation	USN-1	As a user, I can enter text (up to 3000 characters) in the input area for translation.	Text area accepts input and displays character count.	High	Sprint-1
End User (Web)	Text Translation	USN-2	as a user, I can select a source language from a dropdown of 25+ languages.	Dropdown displays all supported languages including "Auto-Detect".	High	Sprint-1
End User (Web)	Text Translation	USN-3	As a user, I can select a target language from a dropdown.	Dropdown displays all supported languages (excluding "Auto-Detect").	High	Sprint-2
End User (Web)	Text Translation	USN-4	As a user, I can click "Translate" to get the translation of my input text.	Translated text is displayed side-by-side with original text.	High	Sprint-1
End User (Web)	Auto Detection	USN-5	As a user, I can select "Auto-Detect" as source language and the system will identify the input language.	The detected language name is displayed before translation begins.	High	Sprint-1
End User (Web)	Auto Detection	USN-6	As a user, I can see the "Auto-Detection Active" indicator when Auto-Detect is selected.	A pulsing indicator shows that auto-detection mode is enabled.	Medium	Sprint-1
End User (Web)	Translation Controls	USN-7	As a user, I can click "Swap" to interchange source and target languages.	Languages swap positions in the dropdowns.	Medium	Sprint-2
End User (Web)	Translation Controls	USN-8	As a user, I can click "Copy" to copy the translated text.	Translated text can be copied to clipboard.	Medium	Sprint-2
End User (Web)	Translation Controls	USN-9	As a user, I can click "Reset" to clear all inputs and start a new translation.	All fields are cleared and the interface resets.	Medium	Sprint-2
End User (Web)	Translation Controls	USN-10	As a user, I can click "Share" to share the translated text.	Share prompt is shown with instructions.	Low	Sprint-2
End User (Web)	Progress Feedback	USN-11	As a user, I can see a progress bar during translation to know the process is working.	Progress bar advances through stages: Initializing → Processing → Generating → Complete.	High	Sprint-1

User Type	Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance criteria	Priority	Release
End User (Web)	Error Handling	USN-12	As a user, I receive an error message if I try to translate empty text.	Error notification displayed: "Please enter text to translate!"	High	Sprint-1
End User (Web)	Error Handling	USN-13	As a user, I receive a warning if source and target languages are the same.	Warning notification displayed: "Select different languages!"	High	Sprint-1
End User (Web)	Sidebar	USN-14	As a user, I can view the features and use cases of TransLingua in the sidebar.	Sidebar displays features list and use case categories.	Low	Sprint-2
